Anglicare Drug and Alcohol Treatment and Support Services Plus (ADATS+)

Has your drug and alcohol use become problematic? Are you experiencing mental health issues or at risk of homelessness?

Free treatment is available for young people aged 12+, across the whole of Tasmania, for any alcohol or other drug problems.

ADATS+ can:

- Work through risks, provide information and develop a plan to support what you want to change
- Provide counselling, information, advice and referrals - depending on need
- Refer to vocational, financial or other social support services

You can either self-refer (no referral form is required) or someone you trust, including your family, friends or healthcare professional can contact us and make a referral.

To make an appointment call **1800 243 232** or email connectsupport@anglicare-tas.org.au

This service is supported by funding from Tasmania PHN (Primary Health Tasmania) through the Australian Government's PHN Program.
